## Pantelleria

Pantelleria, the tip of sunken volcano, emerges from the sea 65 kilometres south of Sicily. It is an island defined by the elements of wind, water, and fire, and is the inspiration behind the latest collection from Solus.

Elena Pancaldi

# An island like no other

The volcano made obsidian, which was tooled and traded here by Neolithic peoples. Capers, tangerines, lemons, and vines grow behind high lava stone walls. Ancient Temples of Venus honour pink lakes fed by invisible thermal springs. The whitewashed domes of traditional homes, dammusi, protect against the wind and heat. The low forests of pine, myrtle, and mastic harbour endemic species, as the garriga of lavender, thyme, and rosemary fill the air with a wild aroma. The sea crashes, relentlessly, upon the beachless shore, carving and shaping the cliffs.

# Our collection

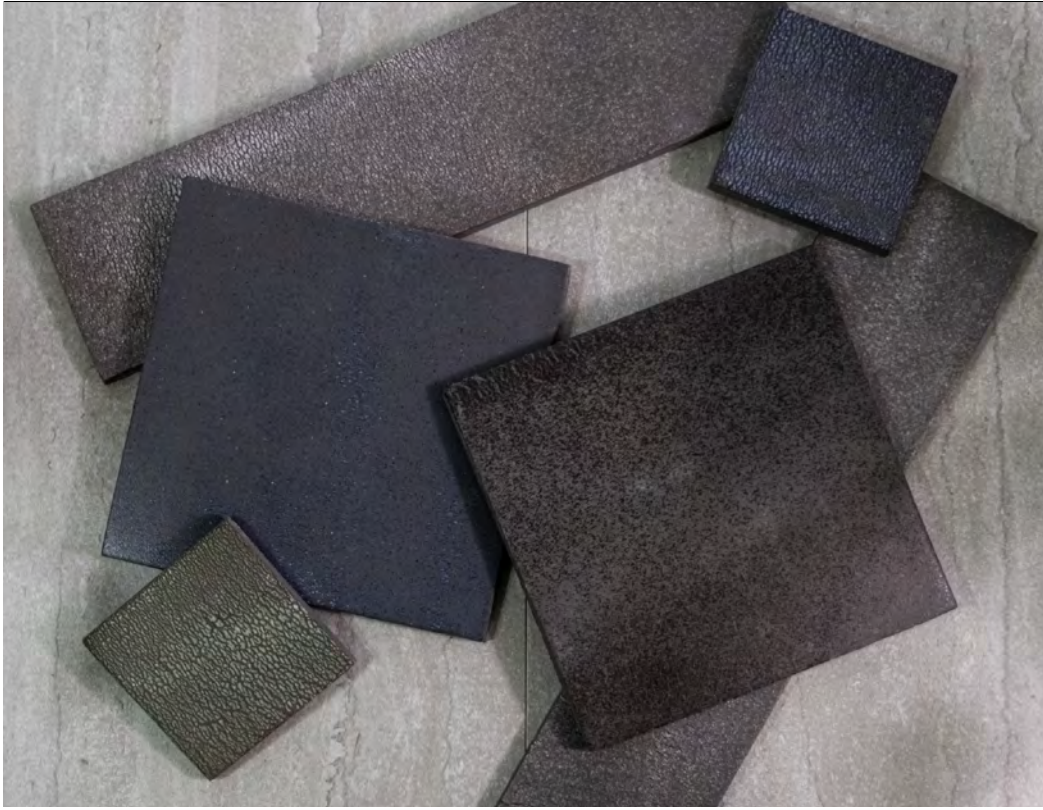

The 'Pantelleria' collection imaginatively recreates the powerful nature of this island. The tiles, crafted from a blend of black clay and refractory stone elements, embody the island's volcanic landscape. The firing process creates organic patterns on the tile surface, reminiscent of cooled lava. The colour palette, featuring lime whites, obsidian, ultramarine, caper green, and a soft pink, echoes the island's natural hues. The tiles are available in two finishes: Natural, with subtle variations in texture and tone, and Textured, a finish that recalls the shimmer of volcanic glass. Three sizes allow for a variety of laying patterns. The collection translates the island's natural and architectural essence into a tangible form.
